Project Title: Recip.me	
Start Date: 4/12/2019	**End Date:** 5/01/2020
Project Manager: Adami Christian	
Project Sponsor: Grazia Cobello, Daniela Saturnino, Nicola Tommasini	
Customer: I.T.I. G. Marconi	
Users: web users	

Stakeholders and Expectations:
Team: Creating a functional website in order to display food recipes. The website will be responsive, user-friendly and with a simple design.

Sponsors: Have a good website that work without problems.

Web users: Use this site to enhance the cooking experience.

Purpose (Problem or opportunity addressed by the project):
Users who take advantage of this site will have a quick and easy way to order ingredients of multiple recipes in order to prepare good meals. A user must log into the site to add ingredients to his shopping cart. This will help web users to improve their cooking skills with little effort.

Goals and Objectives:
The overall goal is to provide an alternative way to order food related to a specific recipe. The site is expected to:
  • Provide a responsive interface to interact with the site
  • Function in a simple and intuitive way
  • Provide some web pages only to registered users

Schedule Information (Major milestones and deliverables):
4/12/2019- Project Charter Complete
xx/12/2019
xx/12/2019

Financial Information (Cost estimate and budget information):
Not Available

Project Priorities and degrees of freedom:
Dates are not flexible without the project manager permission. Roles are changeable based on workload of individual team members or problems regarding the project. Roles are expected to shift throughout the project as needs arise.

Approach: Scrum method is used to develop the project. The first sprint will focus on the basic functionality of the website.

Constraints: The content of the page must follow the internet guidelines and the rules given by the sponsors.

Assumptions: Our team will work in the schools labs or in remote with laptops.

Success Criteria: The project will be considered a success if the team delivers an operational project at the end of the deadline with all the function described in the goal.

Scope: The website will allow users to order ingredients, and to see a list of different recipes. Time permitting the scope could be extended to include other features like for example a personal page with all the user information.

Risks and obstacles to success: A risk the team faces is a lack of experience in developing web pages and databases. This lack of experience generates a lot of unknowns. We have only an idea of the level of work required for the features we have committed to. We do not yet have a clear picture of how the code will be implemented.
